This Lesson 8: Maintaining the Garden Site is brought to you for free and open access by the Urban EcoLab at Digital Commons @ Loyola Marymount University and Loyola Law School. It has been accepted for inclusion in Module 10: Garden Ecology by an authorized administrator of Digital Commons@Loyola Marymount University and Loyola Law School. For more information, please contact digitalcommons@lmu.edu.

Planting Day!

Module 10 - Garden Ecology
Lesson 6: Planting Day!

The Three S's: Staging, Supplies, Students

Staging

Students

Supplies

Why is it important to Stage and Prepare Resources?

1. If you are having multiple classes come out to help plant you need to have all of your supplies staged before the students arrive – so as to save time and be efficient.
2. Make sure you have the tools and supplies in one area, the plants in another, and students lined up and ready to be taught what to do.
3. Stress with the kids that this is a group effort, take the time to teach them each step along the way, from removing the plants from their containers to placing them in the holes – don't do it for them.
4. Have a plan for each grade level to do one task. For example: dig the holes in advance for K-4 grades, help them hold the plants, loosen and place in holes. Have older kids do the actual shoveling of dirt. Keep safety in mind throughout!

Before and After!
